

Handling instructions for self adhesive backnumbers

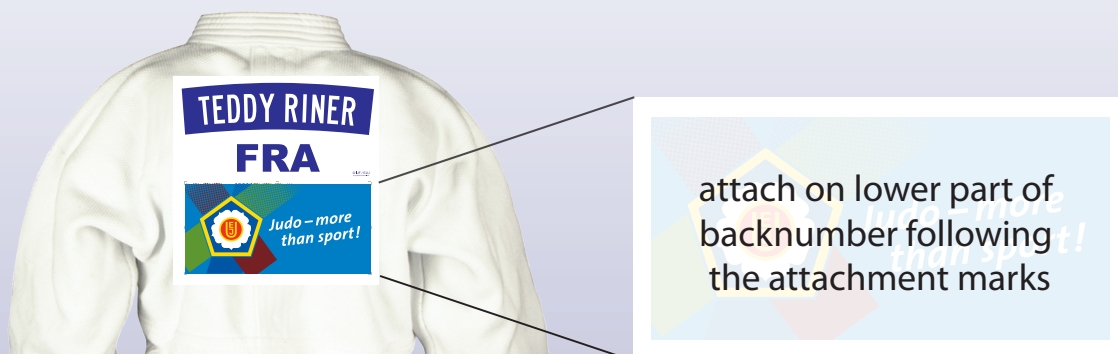

Dear athlete,

participating in IJF or EJU Events you will be probably handed out some self adhesive sponsor labels. These labels need to be placed under the upper part of your backnumber/back patch. (In case, you're still using the old EJU backnumber, the sponsor label has to be attached directly under the backnumber on the Judogi.)

To get the best results with this product, please make sure to:

1. only use on 100% dry judogi, when attaching it,
2. make sure to attach it some hours before usage,
3. remove directly after the tournament to avoid any damage of the underground,
4. do never wash your judogi with the attached sponsor label.

We do not assume any liability for damages of the backnumber or for adhesive residue on the backnumber or judogi.

Best regards
your mybacknumber.com Team
